

ASSOCIATION ACTIVITY (2018– 2019)

Every year, it has been the decorum of the S.D.N.B.Vaishnav College for women to encourage all the departments within the college premises to organize an interdepartmental competitive event among students. For this academic year 2018-19, the physics department marked the beginning of organizing such an event through 'VAISH-PHYZ 2K18' on 27th August, 2018.

Interdepartmental Events

As a part of 'VAISH-PHYZ 2k18, the following events were organized among students:-

- Connections
- Potpourri
- Channel surfing
- Logo creation

CONNECTIONS:

Being an interesting event, the contestants of this event were imposed with a challenge of finding a common word hidden behind the interconnected pictures (4 to 5 pictures) displayed on the screen. This took a shot to analyse and improve the deductive and reasoning skills of students.

POTPOURRI:

True to the subtle meaning of this word 'potpourri', this event was a mélange of various events woven together as one big thing. Each round in potpourri was aimed at bringing out the interactive nature of students and it mainly focused on analysing the social skills of students pertaining to their team work, communicative skills and alternative thinking skills.

CHANNEL SURFING:

This was a highly entertaining competition where the participants as a team were asked to enact a random T.V channel within seconds. This was aimed at improving the perspective thinking of students.

LOGO CREATION:

This was an on spot event with all the participants divided into teams of two members. Each team were asked to create a logo on a simple physics concept within a particular duration of time. This event was conducted to improvise the spirit of team work among students. And it also aimed at bringing out the creative and artistic nature of students.

The event illuminated the artistic and creative ideas of students and concluded with many winners hogging the limelight and trier's taking home some secrets to win situations next time!
