

M.A.Economics
COURSE OUTCOMES (COs)

On completion of the course students will be able to

COURSE COMPONENT	COURSE	COURSEOUTCOME
CORE THEORY –I	ADVANCED MICRO ECONOMIC THEORY	<p>CO1: Acquire in-depth knowledge about the theoretical implications of Consumer's Behaviour and Utility analysis.</p> <p>CO2: Critically examine the returns to scale of production and profit maximization trends in the short run and long run.</p> <p>CO3: Understand the structure and applicability of production functions in terms of economies of scale and maxima and minima attributes.</p> <p>CO4: Analyse the causes and consequences of different market conditions in order to evaluate the price and output decisions of firms under these market structures in the present scenario.</p> <p>CO5: Interpret the nuances of General Equilibrium conditions in terms of its stability and outcomes in the past and present context.</p>
CORE THEORY –II	STATISTICAL METHODS FOR ECONOMICS	<p>CO1: Understand the basic requisites of a suitable sample and the nuances of the sampling distribution meant for problem solving issues under consideration.</p> <p>CO2: Develop analytical reasoning in the field of statistical estimation in order to measure and Diagnose the concerned parameters of the population under consideration.</p> <p>CO3: Obtain clarity in the application of probability distribution directed towards specific economic problems in the context of uncertainties.</p> <p>CO4: Acquire sound inferential skills with regards to the cause and effect implications of the basics of Economic Research.</p> <p>CO5: Imbibe critical thinking in the usage of statistical tools in areas of socio – economic and multidisciplinary research with multiple variables under consideration</p>
CORE THEORY –III	INDIAN ECONOMY	<p>CO1: Examine the theory and application of various macro economic variables towards sustainable development in India.</p> <p>CO2: Understand the implications of the various economic policies in the field of infrastructure and financial inclusion.</p>

		<p>CO3:Assimilate in depth knowledge about the progressof the Agrarian and Industrial economy in India and the Government policy initiatives towards these sectors.</p> <p>CO4: Acquire critical thinking in judging the government strategies adhering for the NewEconomic Reforms.</p> <p>CO5: Develop a scientific temper and critically analyse the recent Government initiatives for promoting Indian Economic development.</p>
CORE THEORY –IV	GROWTH ECONOMICS	<p>CO1: Acquire thorough knowledge about the various sources that impart economic growth that large.</p> <p>CO2: Understand the theoretical views of Economists pertaining to various parameters of economic growth.</p> <p>CO3: Critically examine the applicability of growth models in the Global and Indian context.</p> <p>CO4: Obtain analytical reasoning and sound judgement in the relevance of various exogenous and endogenous growth theories.</p> <p>CO5: Develop a scientific temper in linking theories and practice pertaining to the relevant growth models.</p>
ELECTIVE THEORY-I	MARKETING CONCEPTS	<p>CO1: Acquire in depth knowledge about the modern concept of marketing and its requisites in relevant fields.</p> <p>CO2: Critically examine the core issues of marketing to make it a viable option.</p> <p>CO3: Enhance ability to develop a research temper in determining the recent trends of market behavior and marketing practices.</p> <p>CO4: Determine the ways and means of arriving at ideal pricing strategies suited to innovativeness.</p> <p>CO5: Obtain deep insight and analytical reasoning in to e –marketing strategies for attaining business goals.</p>
CORE THEORY –V	MACRO ECONOMICS	<p>CO1: Acquire a sound theoretical knowledge of National Income concepts, computation of National Income and issues binding it.</p> <p>CO2: Examine the relevance of Macro Economic Models (in particular Keynesian model) and its monetary and fiscal implications.</p> <p>CO3: Develop an analytical process in the domain of expectations and macro economic adjustments.</p> <p>CO4: Infer the current trends prevailing in the market for foreign exchange and the effectiveness of monetary and fiscal policies.</p>

		CO5 : Understand the critical issues of inflation and unemployment and the theoretical implications under a financial crisis.
CORE THEORY –VI	MATHEMATICAL METHODS FOR ECONOMICS	<p>CO1: Understand the basic operations of matrix analysis and its suitability in solving economic problems.</p> <p>CO2: Examine the properties of derivatives of basic functions and the fundamental operations of differentiation and its relevance to the field of Economics.</p> <p>CO3: Apply the concepts of differentiation in the domain of economic ideologies.</p> <p>CO4: Develop analytical skills concerning maximization and minimization strategies in economic concepts related to cost and revenue for providing viable business operations.</p> <p>CO5: Critically analyse the feasibility of production functions and its implications in the attainment of profit maximization.</p>
CORE THEORY –VII	ENVIRONMENTAL ECONOMICS	<p>CO1: Acquire indepth knowledge about the ecological systems and its contribution towards sustainable development.</p> <p>CO2: Obtain clarity in linking the economic theories and concepts to environmental externalities.</p> <p>CO3: Develop critical thinking regarding the usage of environmental resources and in integrating the environmental accounts with the system of National Accounts.</p> <p>CO4: Analyse the environmental costs concerning issues of economic development and the relevance of several policy instruments for controlling various types of pollution.</p>
		CO5: Develop a deep insight into the nuances of Environmental Education and its applicability in the National and Global scenario.
CORE THEORY-VIII	DEVELOPMENT ECONOMICS	<p>CO1: Understand the growth and development ideologies and development perspectives that need to be applied in the context of the Indian economy.</p> <p>CO2: Critically examine the impact of the various factors that play a vital role in the development process.</p> <p>CO3: Develop critical thinking in the field of resource allocation and policy choices made by the state towards attainment of social and economic welfare.</p>

		<p>CO4: Imbibe the much needed ethical values manifesting the role of environment in sustainable development.</p> <p>CO5: Analyse the functioning of the financial decisions reflecting in the process of economic development.</p>
ELECTIVE THEORY-II	DEMOGRAPHY	<p>CO1: Understand the basic ideologies and theories of population growth.</p> <p>CO2: Examine the trends prevailing in the composition, quality and size of population in India.</p> <p>CO3: Develop analytical reasoning in the issues concerning parameters and determinants of population trends in India.</p> <p>CO4: Critically examine the vital issues concerning migration both internally and interntionally and its distribution concerns in the rural and urban perspective.</p> <p>CO5: Infer the effectiveness of the past and prevailing population policy of India so as to suggest ideal policy measures.</p>
CORE THEORY-IX	ECONOMETRIC METHODS	<p>CO1: Examine the nature and scope of basic econometric concepts and techniques.</p> <p>CO2: Establish the advanced topics in regression analysis and its application in Economic concepts.</p> <p>CO3: Estimate the econometric model by method of least squares, properties of estimators which will help us in forecasting.</p> <p>CO4: Analyze the economic variable by applied econometric analysis and to develop skills required in empirical research in economics.</p> <p>CO5: Analyze the panel data models and methods of estimation using statistical concepts.</p>
CORE THEORY-X	MONETARY ECONOMICS	<p>CO1: Understand the evolution of money and its theoretical implications.</p> <p>CO2: Acquire a sound theoretical knowledge about the classical and neo classical theories of money and its empirical review.</p> <p>CO3: Examine the working of the financial system and the role of financial markets and institutions.</p> <p>CO4: Analyse the theories of money supply and understand the nature and role of financial systems.</p>

		<p>CO5: Obtain a deep understanding of the effectiveness of the monetary policy in India and the efficiency of credit control instruments.</p>
<p>CORE THEORY-XI</p>	<p>RESEARCH METHODS IN ECONOMICS</p>	<p>CO1: Assimilate the basic elements of resource ineconomics including its conceptual and operational definitions.</p> <p>CO2: Examine the various sources and methods ofdata collection and the reliability of a good sample and the sampling techniques.</p> <p>CO3: Develop a scientific temper in approaching the various stages of research process and in the preparation of research design.</p> <p>CO4:Acquire inferential skills and articulation inthe art of eport writing and presentation of thesis.</p> <p>CO5: Analyse the reliability of applicability ofvarious statistical tools and testing procedures in the field of economic research.</p>
<p>CORE THEORY-XII</p>	<p>HUMAN RESOURCE MANAGEMENT</p>	<p>CO1: Understand the significance of human resource management, relevance of humanresource policies and planning.</p> <p>CO2: Identify the techniques and methodologies, which form the basis for job analysis and anideal recruitment and selection in an organization.</p> <p>CO3:Ability to analyse indepth and infer thoroughthe methods of performance appraisal.</p> <p>CO4: Critically examine the various theories pertaining to the need and benefit of adoptingmotivational strategies for attaining individual and organizational objectives.</p> <p>CO5: Examine the effectiveness of wage policies in India and reconstruct suitable wagestructures for a firm.</p>
<p>ELECTIVE THEORY-III</p>	<p>FINANCIAL SERVICES AND MARKETS</p>	<p>CO1: Clear Understanding about the financial services offered in India and develop an ability to access the prospects and challenges</p> <p>CO2: Examine the significance of the core financial service offered</p> <p>CO3: Asses the significance of Indian money market and critically examine the major instruments involve</p> <p>CO4: Develop deep understanding about the fundamentals of the Indian capital market and critically asses the current development</p> <p>CO5: Provide clear understanding about the functioning of the Indian stock exchange and its regulatory body.</p>

CORE THEORY-XIII	PUBLIC ECONOMICS	<p>CO1: Understand the significance of public finance and the normative role of the government in optimizing social advantage using appropriate fiscal tools.</p> <p>CO2: Obtain indepth knowledge about the theoretical approaches towards public expenditure and its relevance in the present context.</p> <p>CO3: Critically examine the system of taxation in a country and its implications and the need for deficit financing.</p> <p>CO4: Explore the various ways of public debt management and matters relating to fiscal Rules consolidation.</p> <p>CO5: Analse the existing financial structure and its implications in terms of Inter Governmental Grants and devolution of finance.</p>
CORE THEORY-XIV	INTERNATIONAL ECONOMICS	<p>CO1: Understand the theoretical implications and issues relating to International Trade.</p> <p>CO2: Critically examine the suitability and soundness of International Trade Policy and its initiatives.</p> <p>CO3: Assimilate the vital issues concerning Internal finance and the portfolio adjustment.</p> <p>CO4: Analyse the cause and consequences of the open economy adjustment policies in the current scenario.</p> <p>CO5: Develop a scientific temper in judging the specific approaches to trade policy arrangements and the functioning of various International Organisations.</p>
CORE PRACTICAL -I	COMPUTER APPLICATIONS IN ECONOMIC ANALYSIS	<p>CO1: Understand the nuances of various statistical commands and applications including spread sheet operations.</p> <p>CO2: Acquiring data entry skills using SPSS, E- views and STATA packages meant for statistical analysis.</p> <p>CO3: Analysing and estimating economic variables using effective statistical processing techniques and methods.</p> <p>CO4: Develop a scientific temper in approaching trend forecasting and testing analysis from a research perspective.</p> <p>CO5: Critically analyse the applications of various economic analysis using SPSS, E – views and STATA packages.</p>
ELECTIVE THEORY-IV	TAMIL NADU ECONOMY	<p>CO1: Obtain a deep understanding about the History and culture of Tamil Nadu along with its geographical features.</p> <p>CO2: Understand the demography and social infrastructure prevailing in the Tamil Nadu economy.</p>

		<p>CO3: Critically examine the effectiveness of economic planning and development in Tamil Nadu and the attainment of its vision 2023.</p> <p>CO4: Assess the performance of the agriculture and industrial sectors and its future prospects.</p> <p>CO5: Acquire analytical reasoning to evaluate the performance of the Tamil Nadu economy in the fields of economic infrastructure, service sector and its initiatives.</p>
ELECTIVE THEORY-V	ENTREPRENEURIAL DEVELOPMENT AND STARTUP	<p>CO1: Gaining good insight into the existence and nature of the entrepreneurship climate in India and functions of an entrepreneur.</p> <p>CO2: Development of analytical reasoning and critical evaluation regarding the role of Government in promoting Entrepreneurship for establishing self employment as a viable career option.</p> <p>CO3: Gaining good insight about the financial support to the entrepreneurs.</p> <p>CO4: Develop a start-up Enterprise with Big Idea Generation Analyze start-up capital requirement by analyzing legal factors. Interpret feasibility Analysis towards funding.</p> <p>CO5: Access growth stages in new venture and reasons for scaling ventures. Evaluate financial stability and decide on expansion possibilities</p>
